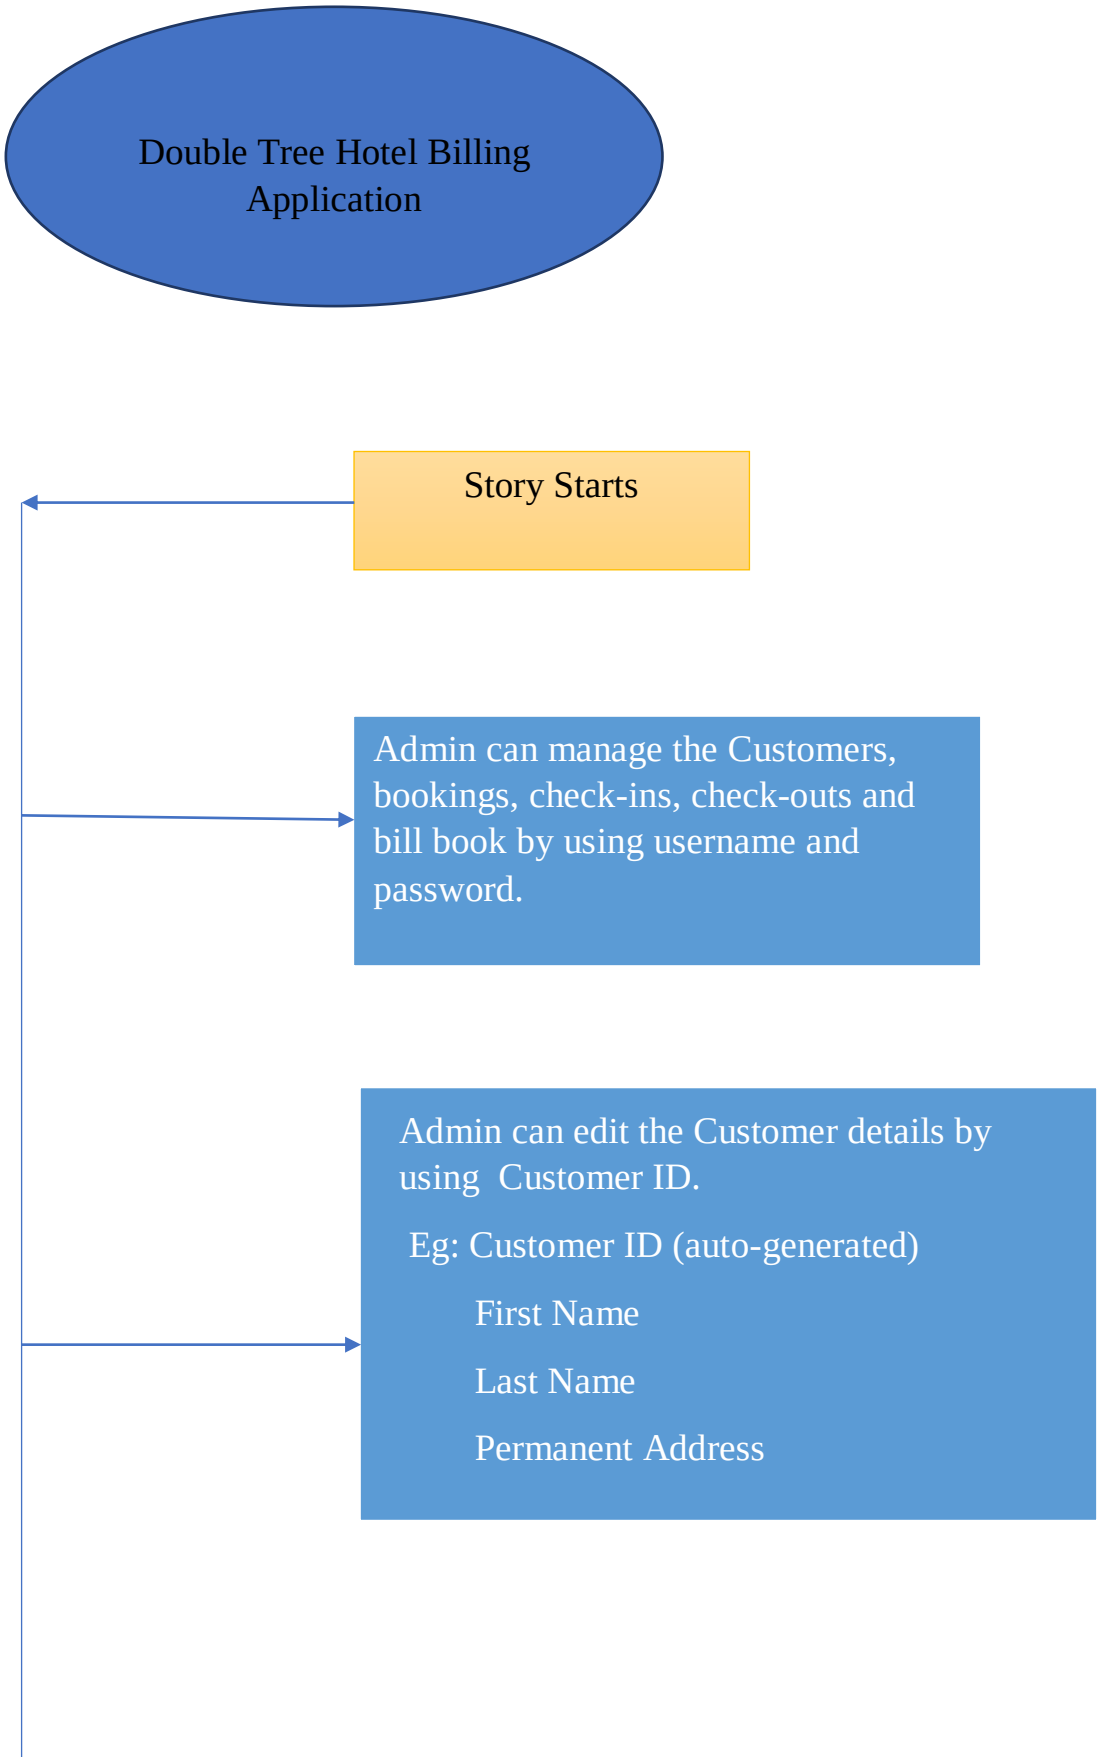
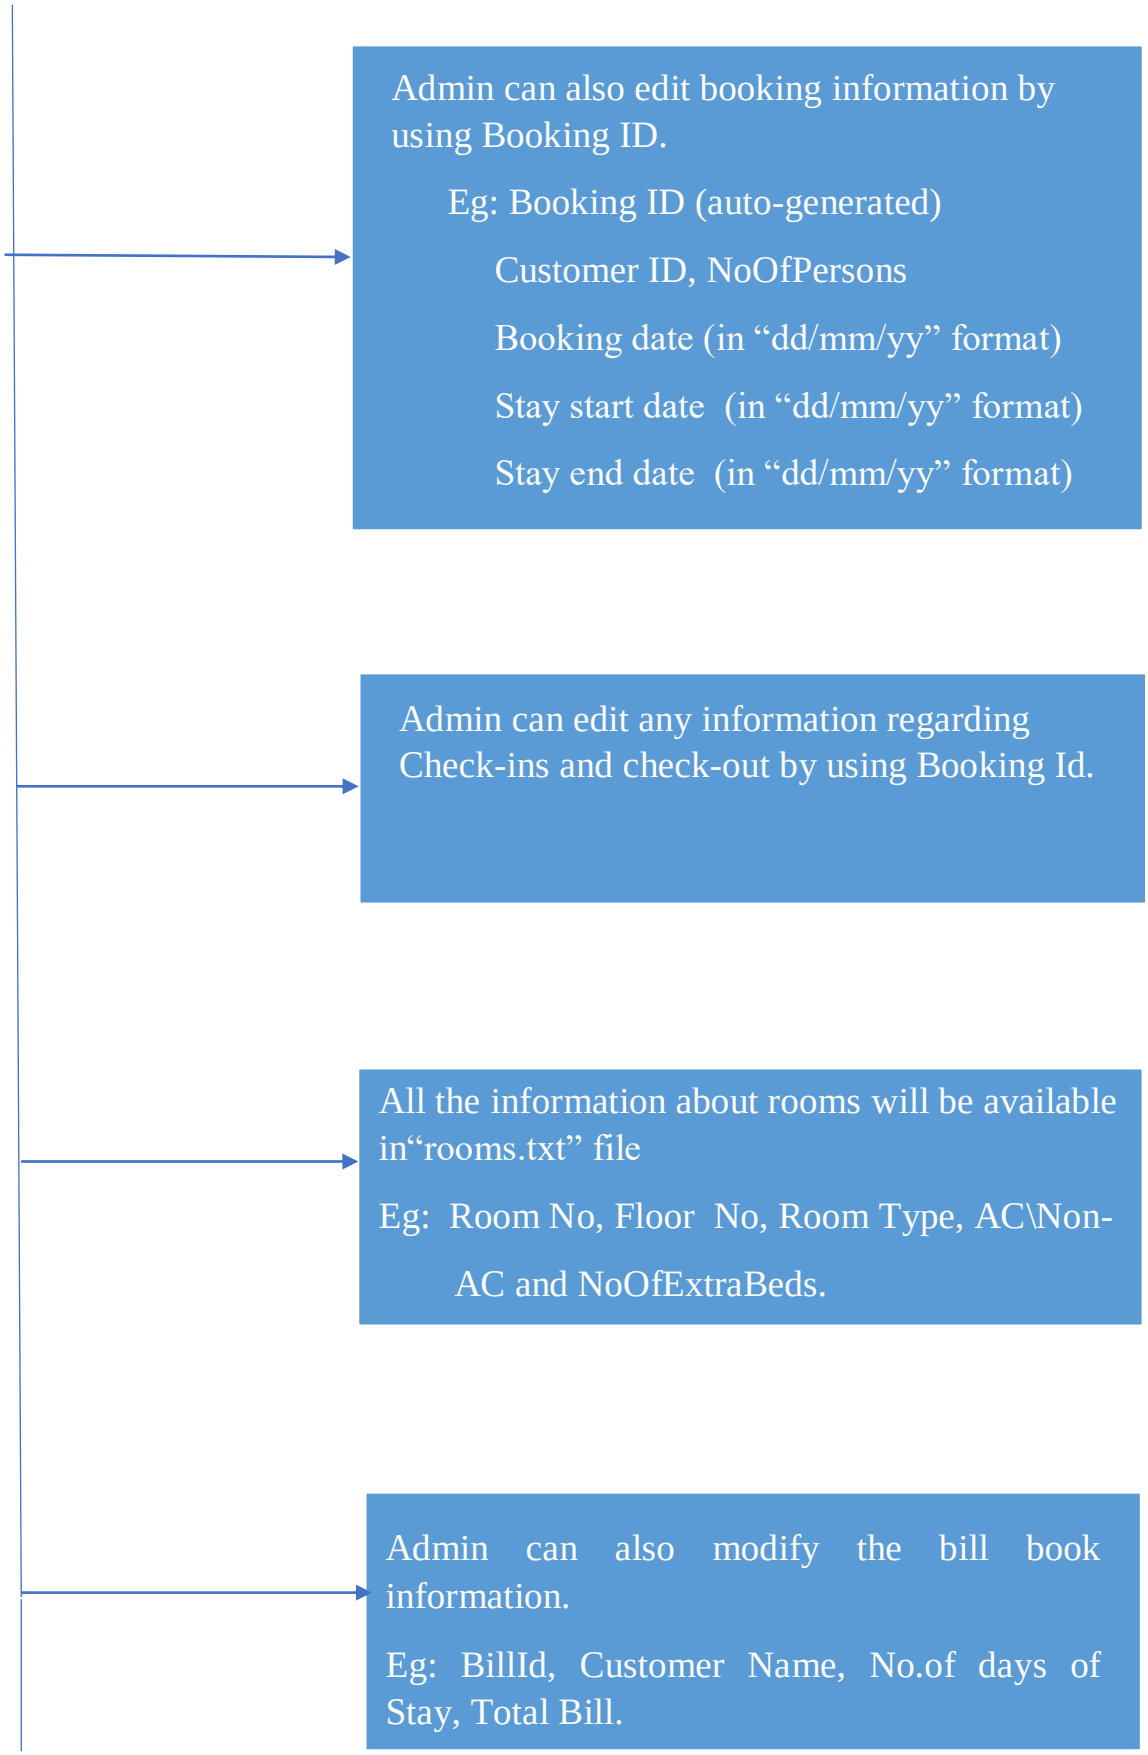
Story-

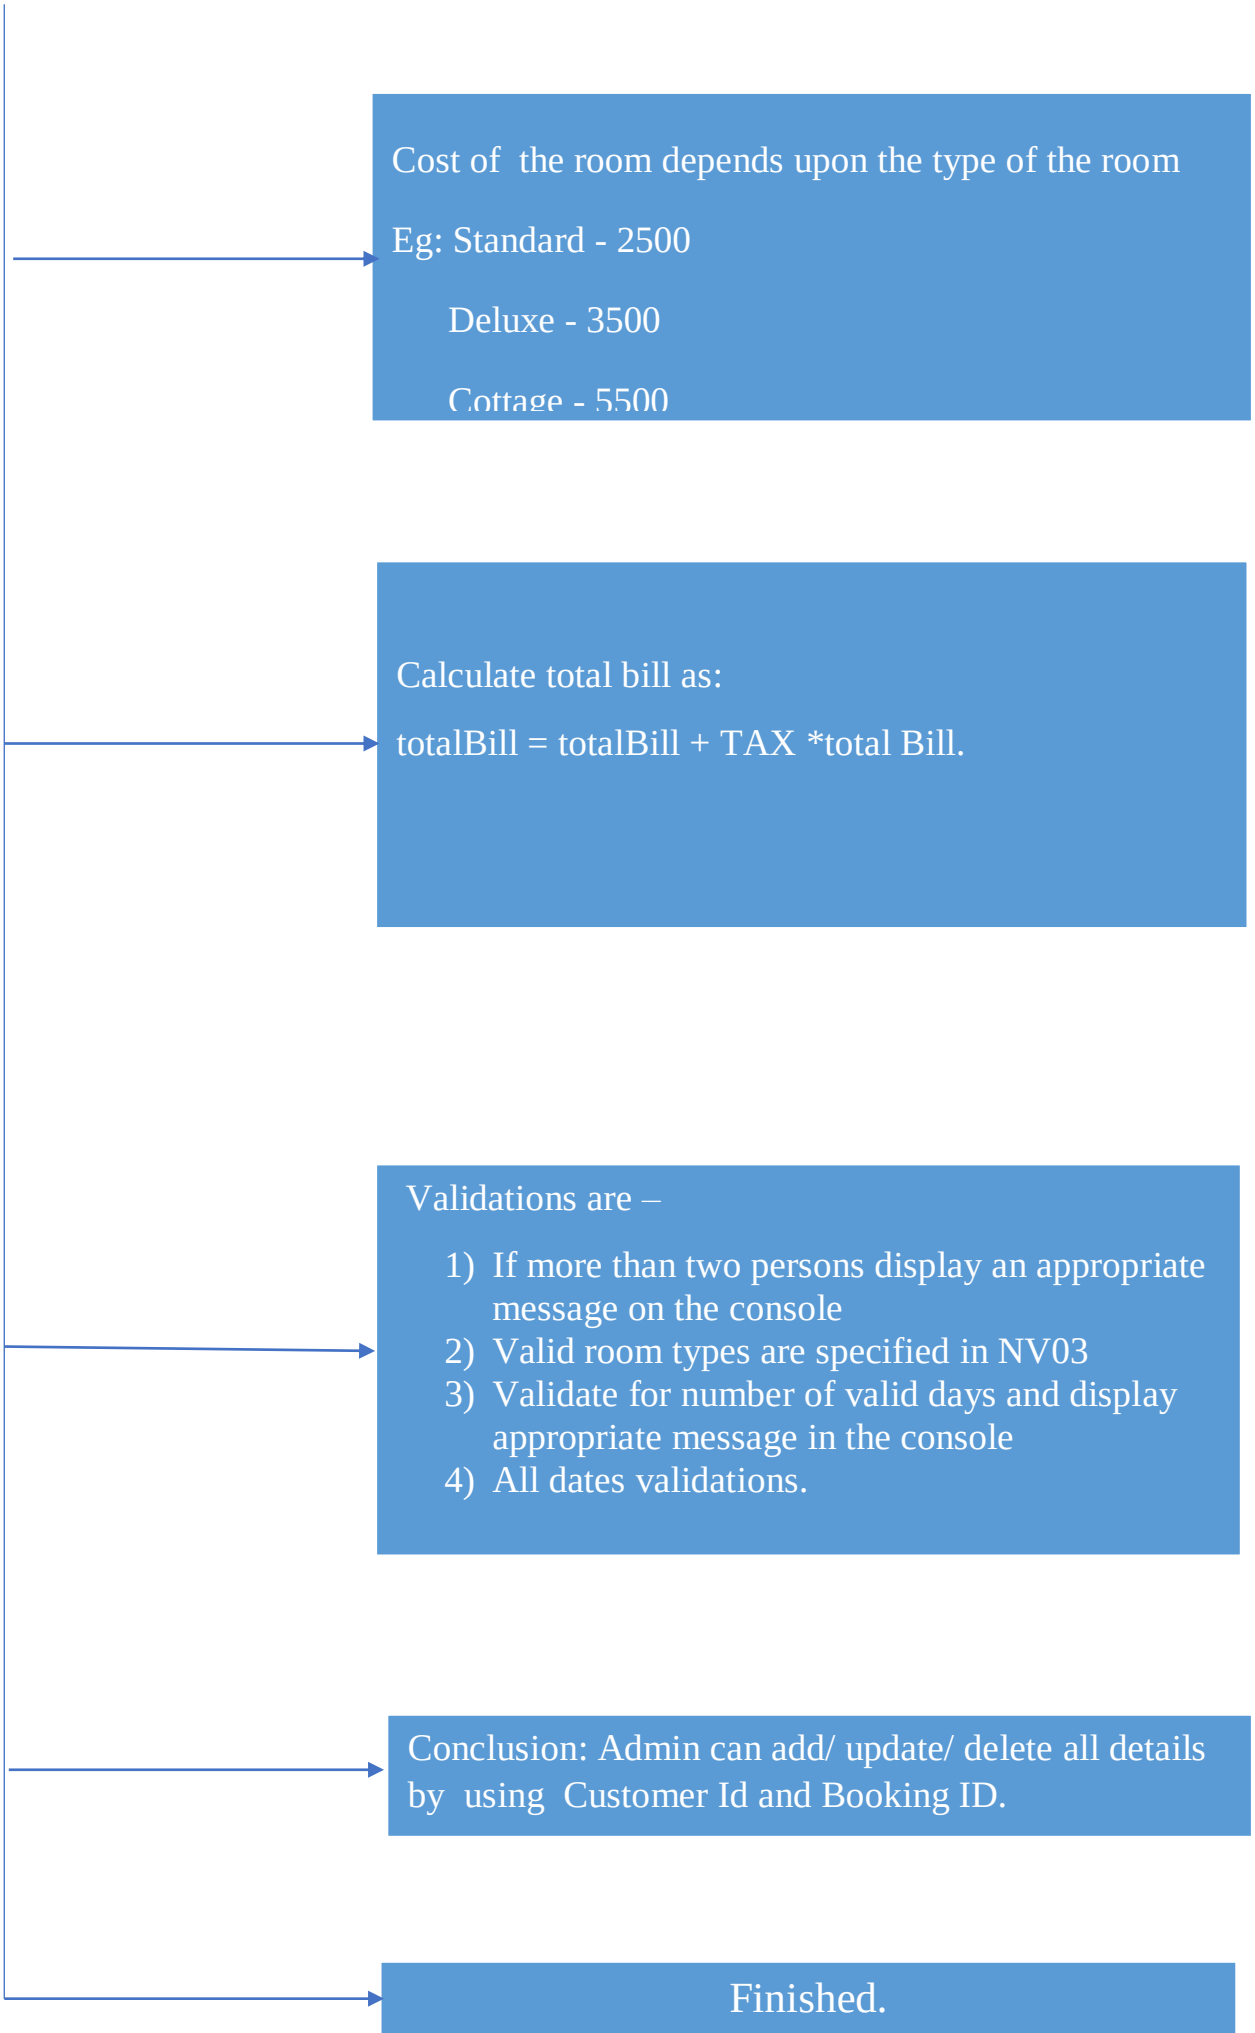
The Story is about the description and basic flow of Double TreeHotel Billing application.

Story Board





Admin can also edit booking information by using Booking ID.
Eg: Booking ID (auto-generated)
Customer ID, NoOfPersons
Booking date (in “dd/mm/yy” format)
Stay start date (in “dd/mm/yy” format)
Stay end date (in “dd/mm/yy” format)
Admin can edit any information regarding Check-ins and check-out by using Booking Id.
All the information about rooms will be available in“rooms.txt” file
Eg: Room No, Floor No, Room Type, AC\Non-AC and NoOfExtraBeds.
Admin can also modify the bill book information.
Eg: BillId, Customer Name, No.of days of Stay, Total Bill.



Cost of the room depends upon the type of the room
Eg: Standard - 2500
Deluxe - 3500
Cottage - 5500
Calculate total bill as:
totalBill = totalBill + TAX *total Bill.
Validations are –
1) If more than two persons display an appropriate message on the console
2) Valid room types are specified in NV03
3) Validate for number of valid days and display appropriate message in the console
4) All dates validations.
Conclusion: Admin can add/ update/ delete all details by using Customer Id and Booking ID.
Finished.
